THE
APPLICATION
OF THE
TABLES OF SIMPLE INTEREST.

OF TABLE I.

THIS TABLE, beginning with 1 Day, and carried on to 400 Days, will shew the Interest of any Sum of Money, of any Species; giving the Answer in the same Species of Money, or Denomination, with the Principal Sum given.

In the Left hand Column of every Page, under the Word *Sum*, are the Nine following Figures, viz. 1, 2, 3, 4, 5, 6, 7, 8, 9; the Value of which Figures may be increased or decreased, at Pleasure;

Thus 1 denotes 1 - 10 - 100 - 1000 - 10000 - 100000, &c.
2 2 - 20 - 200 - 2000 - 20000 - 200000, &c.
3 3 - 30 - 300 - 3000 - 30000 - 300000, &c.

To compute Interest by this Table, nothing more is required than to take from the Column under the Number of Days given, right against the Principal, the same Number of Figures or Places, as there are Figures or Places in the Principal; and the Figures remaining to the Right will be Decimal Parts; the Sum thus given will be the Answer, at 1 per Cent. and if multiplied by the Rate per Cent. will be the Answer required, in Whole Numbers and Decimal Parts; the Value of the Decimal Parts will be given by the Table of Decimal, or *Residual* Parts, answering to the Species of Money for which the Interest is required.

EXAMPLE I.

What will the Interest of 60000 Sicca Rupees amount to in 315 Days, at 1 per Cent. per Ann?

S. R. Parts. S. R. A. P.

60000 Sicca Rupees for 315 Days, is 00517.8082 or 517 - 12 - 11 Answer.

60000 Sicca Rupees being Five Figures, or Places, the same Number of Places are taken from the Column under 315 Days, which is the Answer, at 1 per Cent. and the Figures to the Right are Decimal Parts, the Value of which is found by Table XXIX.

EXAMPLE III.

What will the Interest of 6001 Sicca Rupees, 10 Annas, 8 Pie, amount to in 31 Days, at 8 per Cent. per Annum?

31 Days multiplied by 8, the Rate per Cent. makes 248 Days.
And 10 As. 8 P. red. to Pts, by Table XXIX = 666 Parts
6000 Sicca Rupees, for 248 Days, is — 0040.767
1 — is — 0.006
600 Parts is — 0.004

Sicca Rupees 40.777
Or S. R. 40 - 12 - 5 Answer.

* Place the Interest given for Parts directly under Parts, and not under the Integers.

EXAMPLE IV.

What will the Interest of 30060l. 10s. amount to in 200 Days, at 5 per Cent. per Annum?

10 Shillings are equal to 500 Parts.

EXAMPLE V.

What will the Interest of 900000 Bombay Rupees 2 Qrs. amount to in 399 Days, at 10 per Cent. per Annum?

2 Qrs. are equal to 500 Parts.
900000 for 399 Days, is 009838.3561
500 Parts is .0054

Bombay Rupees 9838:3,615
Or Bom. Rs. 98383-2 Qrs. 46 Reas, Answer.

Whenever the Rate of Interest is 10 per C. take one Figure more than the Answer at 1 per Cent. and the Answer will be given at 10 per Cent.

EXAMPLE VI.

What will the Interest of 600000 Spanish Dollars 7 Rials amount to, in 310 Days, at 8 per Cent. per Annum?

7 Rials are equal to 875 Parts.
Dollars. Parts.
600000 for 310 Days, is 005095.8904
800 Parts — is — .0067
70 — — — .005

Dollars 5095.8976
Multiply by the Rate per Cent, — 8

Answer, Dollars 40767.1808
Or 40767 Dollars, 1, Rial 7 Marvadies.

EXAMPLE VII.

What will the Interest of 60600 Pagodas, 21 Fanams, amount to, in 212 Days, at 12 per Cent. per Annum?

21 Fanams is equal to 500 Parts.
60600 Pagodas for 212 Days, is 00348.4931
600 for Ditto, — 003.4849
500 Parts, — — .0029

Pagodas 351.9809
Multiply by the Rate per Cent. 12

Answer, Pagodas 4223.7708
Or 4223 Pagodas, 32 Fanams, 29 Cash; at 42 Fanams to a Pagoda.

EXAMPLE

iv THE APPLICATION AND

EXAMPLE VIII.

What will the Interest of 60000l. amount to, in 3460 Days, at $5\frac{1}{2}$ per Cent. per Annum?

60000, for 346 Days, is 1 00568.7671
Multiply by the Rate per Cent, $5\frac{1}{2}$

2843.8355
284.3835

One Place beyond the Point,
gives the Answer for 3460 Days.

3128.2, 190
l. s. d.
Or 3128-3-9 $\frac{1}{2}$ Ans.

It is evident, from the foregoing Example, that the Table will give the Interest for any Number of Days whatever; — It only requires that the Nature of the Table should be well comprehended; and, when that is done, every Thing will appear both easy, and simple. If you take one Figure, or Place, more to the Right, than the Interest at 1 per Cent. it increases it Ten times; and, consequently, will be the Interest at 10 per Cent, or the Interest for Ten times the Principal; or for Ten times the Number of Days given, according as the Case requires. If you take two Places, or Figures, it increases the Interest an Hundred times. If you take three Figures, or Places, it increases it a Thousand times, &c. &c. &c.

EXAMPLE IX.

What will the Interest of 346366 Rupees amount to in 800 Days, at 10 per Cent. per Annum?

Under 346 Days, and against 800, for 346000, is 007583.5616
366 - 800 - 366 - 008.0219

Answer, Rupees 7591.5, 835
Or Rupees 75915-13-4

In the foregoing Example, I have changed the Principal into Time, and the Time into Principal; by which Means, I get the Answer, in collecting twice. The Answer, at 10 per Cent. is found, by taking one Figure, or Place, beyond the Point, which is just the same as if the Interest at 1 per Cent. had been multiplied by 10.

EXAMPLE X.

What will the Interest of 346000 Sicca Rupees amount to, in 10 Years, at 10 per Cent. per Annum?

300000 for 1 Year, is 003000.000
40000 - - - - 00400.000
6000 - - - - 0060.000

Interest at 1 per Cent. for 1 Year, 3460.000
Ditto at 10 per Cent. for 1 Year, 34600.00
Ditto at 10 per Cent. for 10 Years, 346000.0 Answer

The above Answer might have been taken at once, by taking Two Figures to the right: that is, One Figure on account of 10 per Cent, and One on account of 10 Years: — Taking One Place to the Right, increases the Interest Ten times; Two Figures to the Right, increases it a Hundred times; three Figures, a Thousand times; and so on *ad infinitum*.

OF TABLE

USE OF THE TABLES.

OF TABLE II. and III.

These Tables shew the Interest of any Sum of Money, for Months, or Months and Days together; according to the common Method of computing Interest in Bengal. And likewise for any number of Years whatever.

EXAMPLE I.

What will the Interest of 90000 Sicca Rupees amount to, in 6 Months 9 Days, at 8 per Cent. per Annum?

Sa. Rs.

By Table II. 90000 for 6 Months 9 Days, is 03780-0-0. Answer.

EXAMPLE II.

What will the Interest of 90000 Sicca Rupees amount to, in 6 Months 9 Days, at 12 per Cent. per Annum?

Sa. Rs.

By Table III. 90000 for 6 Months 9 Days, is 05670-0-0. Answer.

EXAMPLE III.

Sa. Rs.

What will the Interest of 90000-8. amount to in 5 Months 11 Days, at 12 per Cent. per Annum?

8 Annas are equal to 500 Parts.

900000 For 5 Months 11 Days, is 048300.

9.	-	-	-	is	0.483
.500	Parts	-	-	is	.016

Answer Sicca Rupees	48300.509
Or Sicca Rupees	48300-8-2

EXAMPLE IV.

What will the Interest of 80010 Pagodas 21 Fanams amount to in 6 Months 11 Days, at 8 per Cent per Annum?

By Table II. 80000 Pagodas for 6 Months 11 Days, is 03573-333

10	-	-	-	is	00.446
21	Fanams	are equal to 300 parts	-	is	.022

21 Fanams are equal to 300 parts

Answer Pagodas	3573.802
Or Pagodas	3573-33-54 Cash

From

vi THE APPLICATION AND

From the Nature of the Tables it is obvious, that whatever Species of Money the Principal given may be, the Interest will also be of the same Name. Hence it may be easy for those who do not understand Decimals, to find the Interest of the lower Denominations given, and to add such Interest to the Interest found for the highest denomination: Thus, Suppose the Interest of 15 Annas 6 Pies for 6 Months 23 Days is required, at 8 per Cent. per Annum. Reduce the Annas and Pies into Pies, and collect from the Column under the Time given in the same manner as Rupees, and the Answer thus given will be Pies and Decimal parts of a Pie, to be added to the Answer found for the Rupees.

15 Annas 6 Pies, is 186 Pies.
 Therefore 100 Pies for 6 Months 23 Days is 004 511
 186 Pies parts
 is 03 157
 is 02 70

Answer Pies 7.938
 Or 8 Pies nearly.

The Interest of all other Denominations may be had after the same manner; but there is no method, whatever, so concise as that of reducing the lower Denominations to Decimals, and finding the Interest for such as a Whole Number.

EXAMPLE V.

What will the Interest of 6400 Current Rupees, 14 Annas, Five Pie, amount to in 10 Years, at 8 per Cent per Annum?

C. Rs. Pts.
 14-5 is 900 Parts; therefore the Principal is 6400.900
 6000. Current Rupees for 1 Year, is 0480.000
 400. - - - 032.000
 .900 Parts, - - - .072

Answer, Current Rupees 512.072
 Or, Current Rupees 5120-11-6.

One Place more to the right-hand gives the Interest at 10 per Cent.
 Or the Same may be done by omitting the Points: thus,

C. Rs.
 The Principal, as before, 6400900

Then 6000000 for 1 Year, is 0480000
 400000 - - - 032000
 900 - - - 072

Interest for 1 Year, Current Rupees 512,072
 Or for 10 Years, - 5120.72 = 11-6, as before.

USE OF THE TABLES.

vii

As the Decimal Places, or Figures, annexed to the Principal, consisted of three Figures, or Places, the same Number of Figures are likewise cut off to the right of the Product; which gives the Interest for one Year; and then one Place more to the Right, gives the Interest for 10 Years; if two Places more to the Right had been taken, it would have been the Interest for 100 Years; and if three Places, it would have been the Interest for 1000 Years; and so on, *ad infinitum*. All other Cases whatever may be done in the same Manner as above, by omitting the Points; and, if the Principal given should be of one Denomination only, then three or four Cyphers may be annexed to it, without a Point between them, and considering the whole as Integers, until the work is done; when the same Number of Figures must be cut off to the right, as there were Cyphers annexed to the Principal. This Method is also applicable to the Tables of Batta and Exchange.

A general Rule to be observed, in adding Repetends, or infinite Decimals.

When all, or any of the Sums collected, repeat a single Digit, add 1 to the Sum of the first, or right-hand row, for every 9 that is contained in it, and proceed with the rest as in common Addition:

EXAMPLES.

$$\begin{array}{r} \text{Add } 326666 \\ 23333 \\ \hline 350000 \end{array}$$

$$\begin{array}{r} \text{Add } 367777 \\ 4322 \\ \hline 372100 \end{array}$$

$$\begin{array}{r} \text{Add } 35011111 \\ 2533333 \\ 555555 \\ \hline 38100000 \end{array}$$

$$\begin{array}{r} \text{Add } 3777777 \\ 2777777 \\ 1777777 \\ \hline 8333333 \end{array}$$

THE APPLICATION AND
 THE APPLICATION
 OF THE
 TABLES OF BATT A.
 THE TABLES EXPLAINED.

THE First Six Tables, viz. Tables IV, V, VI, VII, VIII, & IX, reduces Sicca Rupees, 13 per Cent. Rupees, 11 per Cent. Rupees, 10 per Cent. Rupees, 8 per Cent. Rupees, and Current Rupees, into each other; and each column is marked at the top, with the Species it contains. Thus, in the first Table the left hand narrow Column, right over the following Nine Figures, viz. 1, 2, 3, 4, 5, 6, 7, 8, 9, is marked 16 per Cent, which denotes Sicca Rupees, or Rupees 16 per Cent, better than Current; the next Column to the right shews the Value of the former in 13 per Cent Rupees, or old Sicca Rupees, and are 13 per Cent better than Current; the next Column shews the Value in 11 per Cent Rupees, which denote Sonant Rupees, or Rupees 11 per Cent, better than Current; the next or third Column shews the Value in 10 per Cent. Rupees, which are called Bombay and Madras Rupees, and are 10 per Cent. better than Current; the next or fourth Column, shews the Value in 8 per Cent. Rupees, or Arcot Rupees, and are 8 per Cent. better than Current; and the next and last Column shews the Value in Current Rupees.

To prevent any trouble in collecting the Value from the Columns, I have placed the Nine following Digits 1, 2, 3, 4, 5, 6, 7, 8, 9, over the other Figures or sums in each Column, which will serve as an Index to shew how many Figures or Places are to be taken out for any Sum whatever: Thus, if the Sum to be reduced, is only one Figure, its Value will be found under the Index 1 right against the Sum in the narrow left hand Column, and the Figures that will remain to the right will be Decimal parts: If the Sum is two Figures, its Value will be found under 2; If the Sum is three Figures, its Value is found under 3; If the Sum is four Figures or Places, its Value will be found under 4; If the Sum is five Figures, or Places, its Value will be found under 5; If the sum is six Figures, or Places, its Value will be found under 6; &c. &c.

It is proper to observe, that the nine Figures in the left hand Column, will answer for Annas or Pies, as well as Rupees; Thus, Suppose I wanted to reduce Rs. 6-6-6 to 10 per Cent. Rupees, the Sum I would find against 6 Rupees, would be Rupees and Decimal Parts of a Rupee; but the Sum I would find for 6 Annas, although the same Figures, would be Annas and Decimal parts of an Anna; and the Sum I would find for 6 Pies, would be Pies and Decimal parts of a Pie.—The most concise method of reducing any Species of Rupees into another, when the Sum consist of Rupees, Annas, and Pies, is, to reduce the Annas and Pies to Parts, by Table XXIX and to annex these Parts to the Rupees, either with or without a Point between the Parts and Rupees and to consider the whole as Rupees, and when the whole is collected, to cut off to the right as many Figures or Places, as there were Figures or Places in the Parts annexed; the Value of the parts cut off, will be found by the same Table of Decimal Parts, that gave the Parts for the Annas and Pies, or by Table XXVIII.

EVERY Attempt towards, and Improvement in, Calculations of Tables, on so universal and important a Subject as that of Simple Interest, I flatter myself will meet with general Approbation and Encouragement:—A full Persuasion of this induced me to submit to the Service of the Public the following concise Set of Tables, which are not only calculated to shew, by bare Inspection, the Interest of any Sum that can possibly be required, but are also applicable to all Species of Money with equal Facility; and will satisfactorily answer all the Purposes of the numberless Volumes hitherto published on this Subject.

The Tables of *Batta* and Exchange are constructed on the same Plan with the Tables of Simple Interest; and, from their Variety, which exceed, by far, any thing of the Kind ever published, I flatter myself, they cannot fail of being very acceptable.

In order to render all Calculations dependant on the Tables throughout, both easy and familiar to every Capacity, I have added Tables of Decimal or Residual Parts, for shewing the Value of any Number of Decimal Parts by Inspection.—These Tables are calculated to answer several Species of Money; and, to prevent the Trouble of turning over the Pages, when making many Calculations

P R E F A C E.

Calculations, they are made to fold in, and open out, at Pleasure; by which Means, both the Table by which the Calculation may be made, and the Table shewing the Value of the Decimal or Residual Parts, may be seen at one View.

The Nature and Application of the Tables in general will be found fully explained by the Examples at large in the Instructions given after this Preface; I have only, therefore, to observe, that nothing has been omitted which might tend to render the following Pages useful; and every possible Care and Attention have been given, both in their Calculation and Correction, to render them deserving the Favour and Confidence of the Public; to whose Indulgence, Candour, and Judgement I now beg Leave to submit them, sincerely wishing that they may answer the End designed, with Ease, Accuracy, and Expedition.

C. Rs. 324011.5198-8-3

Or C. Rs. 324011-8-3

Either of the above Methods may be used, for they are both the same, only the Points are omitted in the First, and no Notice taken of the Decimal Parts, till the Whole is added together, when Four Figures, or Places, are cut off to the Right, on account of Parts that were annexed to the Rupees.

Or it may be done by first reducing the Rupees, as in Example II, and then reducing the Annas and Pies separately, and the Value of the Annas and Pies being added to the Former, will be the Answer. Thus, suppose we take the last Example, viz. A. Rs. 300010-10-8 to be reduced to Current Rupees.

As above 300000 is 324000
10 is 10.800

THE APPLICATION AND

The Value of the Annas and Pies may be found after several Ways, but the most concise is that given in Example III. where the Annas and Pies are reduced to Parts, and annexed to the Rupees. However, I will add the following Example and conclude: First, reduce the Annas and Pies into Pies, and collect from the Table as if Rupees, and the Value found will be Pies and Decimal Parts.

Ans.Ps.
Thus, 10-8 = 128 Pies, therefore against 100 Pies - is - C. Pies. 108 000
20 — - is - — 21.600
8 — - is - — 8.640
Answer C. Pies. 138.240
Or Annas 11 - 6.240

The Application of Tables X. and XI.

These Tables are calculated for the more readier reducing Sicca Rupees into Current Rupees, and Current Rupees into Sicca. — Thus, Suppose it is required to reduce 6, 60, 600, or 60000 Sicca Rupees into Current, the Answer will be found in the Column under 0, right against 6 S. Rs. in the narrow Column; If 61, 610, 6100, 61000, &c. the Answer will be found in the Column under 1, right against 6; and if 99 or 99000, &c. the Answer will be found in the Column under 9, right against 9 in the Left-Hand Column; and so on of any other.

EXAMPLE I.

Reduce 364651 Sicca Rupees into Current Rupees.

By Table X. 360000 S. Rs. - is - 417600.000
4600 — - is - 5336.000
51 — - is - 59.160

Answer C. Rs. 422995.160
Or C. Rs. 422995.2-7

EXAMPLE II.

Note.—Current Rupees may be reduced to Sicca Rupees, by Table XI. in the same manner as the above.

The Application of TABLE XII.

THIS TABLE is very simple, and requires but little Explanation : — The Names of the Species to be reduced are in the First Column, and the Equivalent will be found in the Column under the Specie in which the Value is required. Thus, If the Sum to be reduced is Current Rupees, you must look for Current Rupees in the First Column ; right against which, and under the Species to which it is required to be reduced, will be found the Answer, by taking the same Number of Figures or Places, as there are Figures or Places in the Sum to be reduced : and the Figures that will remain to the Right will be Decimal Parts of a Rupee ; the Value of which, in Annas and Pies, will be found by Table XXIX.

THE APPLICATION AND
THE APPLICATION
OF THE
TABLES OF EXCHANGE.

THESE Tables being constructed on the same Plan with the Tables of Batta, or Batta Tables, consequently the Manner of turning the Money of one Country into that of another of an equal Value by these, will be similar.
Note that when a Sum of several Denominations is given to be exchanged into that of another Species, to reduce the lower Denominations to a Decimal by the Table of Decimal or Residual Parts; answering to that Species of Money, and annex the Parts to the highest Denomination or Integral Parts, either with, or without a Decimal Point between them; but if the Sum is of one Name or Denomination only, in the room of Decimal Parts, annex Four Cyphers, which will always be a sufficient number of Decimal Places to give the Answer correct.

Exchange with Holland.

In Holland they keep their Accounts in Pounds, Shillings, and Pence Flemish, divided as the British Pound, but more generally in Guilders or Florins, Stivers, and Phinnings, reckoning 16 Phinnings to a Stiver, and 20 Stivers to a Gilder or Florin.

EXAMPLE I.

Bengal remits to Amsterdam 360000 Current Rupees, Exchange at 21 Stivers the Current Rupee. What will this credit Bengal for at Amsterdam?

300000	at 21 Stivers,	is	Gilders 315000.000
60000	—	is	63000.000

Answer, Guilders 378000.000

Dutch Money is reduced into Bengal Currency after the same Manner as above, Regard being always had to the Index.

Exchange with Madras.

In Madras they keep their Accounts in Pagodas, Fanams, and Cash; as likewise in Rupees, Fanams, and Cash: they reckon 80 Cash to one Fanam, and 12 Fanams to one Rupee and 42 Fanams to one Pagoda of Exchange. The number of Fanams to a Pagoda is not always the same; they rise and fall from 36 Fanams to 47 Fanams, and even sometimes to 48 Fanams, or Four Rupees the Pagoda, according to the real or artificial Plenty or Scarcity of Silver Fanams in the Bazaars.

Note, the two Columns in Table XXVIII. are for shewing the Value of the Decimal parts of a Pagoda, in Fanams and Cash, at 36 and 42 Fanams to the Pagoda.

EXAMPLE I.

Bengal draws on Madras for 600001 Current Rupees, Exchange at 418 Current Rupees per 100 Pagodas. How much Madras Currency will pay the Draft?

600000	Current Rupees, at 418,	is	Pagodas — 14354.0669
1	is		0.2392

Answer Pagodas, 14354.3061
Or Pagodas 14354 - 12 - 68 Cash.

In this Example the Value of the Parts is taken at 42 Fanams to the Pagoda.

EXAMPLE

EXAMPLE II.

Madras remits to Bengal 50000 Pagodas, 20 Fanams, Exchange at 410 Arcot Rupees per 100 Pagodas. How much will Madras be credited for in Bengal?

20 Fanams are Parts .5555, at 36 Fanams the Pagoda.

50000 Pagodas, at 410 Rupees, is 205000.0000 Arcot Rupees;

.5000 Parts	—	is	2.0500
500	—	is	.2050
50	—	is	.205 + 20

Arcot Rupees 205002.2775 = 4 - 5 A. P.

Or thus, omitting the Points :

Sum remitted is 500005555 Pagodas ;

500000000 Pagodas, at 410 Arcot Rupees, is 2050000000

5000	—	—	—	is	20500
500	—	—	—	is	2050
50	—	—	—	is	205
5	—	—	—	is	20

Answer, Arcot Rupees 205002.2775 = 4 Ans. 5 Pies.

Or the value of 20 Fanams may be found by Practice, and being added to the Value of the Pagodas, will give the Answer. Thus, I take the Value of 1 Pagoda

				Rs.	As.	Pies.
at 410, viz.	—	—	4.100	or	4	- 1 - 7.2

Then I take the $\frac{1}{2}$ for 18 Fanams, viz.	2.050	or	2	- 0 - 9.6
---	-------	----	---	-----------

Then for 2 Fs, I take 1-ninth of 18 Fs. viz.	0.227	or	0	- 3 - 7.7
--	-------	----	---	-----------

20 Fanams amounts to Arcot Rupees	2	- 4 - 5.3
50000 Pagodas at 410, amounts to	205000	- 0 - 0

Answer as before 205002 - 4 - 5.3

By this Method the Value of the Lower Denominations of what Kind soever may be found, without reducing them to Decimals.

Exchange with Bombay.

In Bombay they keep their Accounts in Rupees, Quarters, and Reas ; reckoning 100 Reas to 1 Quarter, and 4 Quarters, or 400 Reas, to 1 Rupee.

EXAMPLE I.

Bengal draws on Bombay for 60000 Current Rupees, Exchange at 120 Current Rupees per 100 Bombay Rupees. How many Bombay Rupees will pay the Draft.

60000 Current Rupees, at 120, is Bombay Rupees 50000 Answer.

Exchange with Manilla, &c.

In Manilla they keep their Accounts in Dollars or Pesos, or Pieces-of-Eight, Rials, and Mervadies; reckoning 8 Rials to one Dollar, and 34 Mervadies to one Rial. The Course of Exchange, between Bengal and Manilla, is generally from 38 to 45 Spanish Dollars per 100 Current Rupees.

EXAMPLE I.

Bengal remits to China 40000 Current Rupees, at 41 Spanish Dollars per 100 Current Rupees. What will this Remittance amount to at China?

Current Rupees 40000, at 41 Spanish Dollars, is Spanish Dollars 16400 Answer.

EXAMPLE II.

Bengal remits to Manilla 30000 Rs. 8 As. Current, Exchange at $41\frac{1}{2}$ Spanish Dollars per 100 Current Rupees. What will be the Amount of this Remittance in Spanish Dollars, at Manilla?

30000	Current Rupees,	at $41\frac{1}{2}$	Spanish Dollars,	is	12450
3 Annas	is	Parts .500	at ditto,	—	.207

EXAMPLE III.

Manilla draws on Bengal for 50000 Spanish Dollars, 7 Rials, 6 Mervadies, Exchange at 230 Current Rupees per 100 Spanish Dollars. How many Current Rupees will pay the Draft?

7 Rials, 6 Mervadies, is 900 Parts,
50000 Spanish Dollars, at 230, is Current Rupees 115000
900 Parts — — — is — 2.070

Answer, Current Rupees 115002.070
Or 115002 Current Rupees, 1 Anna, 1 Pie.

Note. It will often happen, that in finding the Value of the Parts of one Species of Money in that of another, the Index will point out more Figures or Places to be taken, than there are Figures or Places in Parts given: When this is the Case, place as many of the Right-hand Figures of the Sum shown by the Index, under the other Parts, as there are Figures or Places in the Parts given, to find their Value; and the Figure or Figures that will remain to the Left, will be Integers, or Whole Numbers. See the last Example, where 900 Parts of a Dollar gets 2070, which is Four Figures; but as 900 is only Three Figures, the like Number is pointed off to the Right, and the remaining Figure to the Left, viz. 2, is 2 Rupees, and the Rest are Parts of a Rupee. But if this should not be comprehended by Persons not versed in Decimal Calculations, let them omit the Points entirely, and consider the Whole as a Whole Number, until the Work is finished; when the same Number of Figures must be cut off to the Right, as there were Figures or Places in the Decimal Parts annexed.

The foregoing Table is founded on the common Rule, given by most Authors, for finding the Tonnage of a Ship: that is to say, To multiply the Length of the Keel, by the Breadth, and the Product by Half the Breadth; and the last Product, divided by 95, gives the Tonnage.

The Use of the Table.

Suppose a Ship's Keel 135 Feet, and Breadth on the Beam from out to out, 48 Feet; required the Tonnage.

Against 70 Feet, and under 48, is Tons.	848.8
- 60 - - - - -	727.5
- 5 - - - - -	60.6*
135	Answer Tuns. 1636.9

* One Place less than the Tonnage for 50 Feet, gives the Tonnage for 5 Feet.

To find the Tonnage of all Ships, according to Act of Parliament.

Take the length of the Keel, within Board (so much as the Vessel treads on the Ground), and the Breadth within Board, by the Midship-beam, from Plank to Plank, and half the Breadth for the Depth, then multiply the Length by the Breadth, and that Product by the Depth, and divide the whole by 94, the Quotient will give the true Tonnage.

Therefore, to find the Tonnage according to the last Rule, take the 94th Part of the Tonnage given by the Table, and the same added to the Tonnage gives the Answer.

Thus the Tonnage above given is 1636.9
The 94th Part of which, is - - 17.4

Answer Tons. 1654.3

General Rule for using the two foregoing Tables.

First, find the Mean Diameter of the Cask, by multiplying the Difference between the Head and Bung Diameters, by 65, and adding the Product to the Head Diameter, the same will be the Mean Diameter, under which, and against the Length, will be found the Content, in Gallons.

E X A M P L E S.

Required the Content in Ale Gallons of a Cask, whose Bung Diameter is 36 Inches, Head Diameter 26, and Length 54 Inches.

Bung Diameter	36	Against 50 and under 32 is	under 142.6-33-151.6
Head Diameter	26	- - - 4 - - -	11.4-----12.1
Difference	10		154.0-----163.7
	65	Add - - -	4.8 154.0
	6.50		158.8
Add Head Dia.	26.00		$\frac{1}{2}$ of 9.7 is 4.8
Mean Diameter	32.50		

As the Mean Diameter is greater than 32, and less than 33, the Content is taken, both under 32 and 33; the half of the Difference, added to the Content under 32, gives the Answer for 32.5.

To find the Ullage of a Cask, or the Quantity of Liquor remaining in a Cask, after some has been drawn off. Rule, Divide the Wet Inches by the Bung Diameter; if the Quotient be above .5000 add to it $\frac{1}{4}$ part of the Excess; but if it be under subtract $\frac{1}{4}$ part of the Want, and the Remainder will be a Decimal Number, by which if you multiply the Content of the Vessel, the Product will be the Quantity of Liquor therein.

E X A M P L E.

Bung 32 Inches	Bung 32 (9,000)	.2812 this wants .2188 of .5000
Content 150 Gallons		.0547 is the $\frac{1}{4}$ of .2188
Wet 9 Inches		
	Remainder	.2265
	Multiply by	150 the Content.
Liquor remaining	Answer	33.9750

The Use of Table XXII

EXAMPLE.

What is the Decimal of 9 Annas and 6 Pies ?

Against 9 Annas, and under 6 Pies, at the top, is the Answer, 593.

What is the Decimal of 3 Pies ?

Under 3 Pies, and against 0 Annas, in the Side, is the Answer, 015.

What is the Value, in Annas and Pies, of .348 of a Rupee ?

Look down the first Decimal Column under 0, till you come to the nearest Sum to .348, which by the Table, is .312 ; equal to 5 Annas : then from 312 look to the Right, till you come to the nearest Sum to it, in the Body of the Table, which will be found to be under 7 Pies, at the Top ; so that the Value of the Decimal is found to be 5 Annas and 7 Pies. In like Manner may the Value of any other Decimal Part of a Rupee be found.

The use of Table XXX.

How many Days Interest became due on a Sum of Money, lent the 16th March 1786, which was due the 22d November, in the same Year.

Under March, at the Top, and opposite November, in the side Column, will be found - - - - - 225 Days,

Then add the remaining 6 Days, in November, - - - - - 6

Answer Days. - - - 231

How many Days Interest became due on a Sum of Money, lent the 25th April 1782, which became payable the 19th March 1787.

From 25th April 1782 to 25th April 1786, is 4 Years, or - - - 1460 Days,

From 25th April 1786 to 25th February 1787, is Days - - - 306

From 25th February to 19th March 1787, is odd Days - - - 23

1784, was a Leap Year, therefore add Days - - - 1

Answer Days. - - - 1790
